2016 Kaiser Permanente Educational Loan Repayment For Safety Net Clinical Support Staff Program

CCHN was funded by the Kaiser Permanente Community Health Fund to administer a loan repayment program for clinical support professionals as part of the Preparing the Safety Net for the Future of Health Care initiative.

- Loan repayment will help ease the burden of prior educational debt for clinical support staff health professionals in exchange for a one-year service commitment to the safety net clinic.
- Clinical support professionals who provide direct patient care include: dental hygienists, nursing aides, registered nurses, lab technicians, and positions that do not require more than a bachelor's degree.

Applications considered strong will be those with a commitment to serving the underserved as demonstrated through a written personal statement and supervisor letter of support. Applications must be complete to be considered, and applicants must be in good standing with their employer.

Supported by Kaiser Permanente
